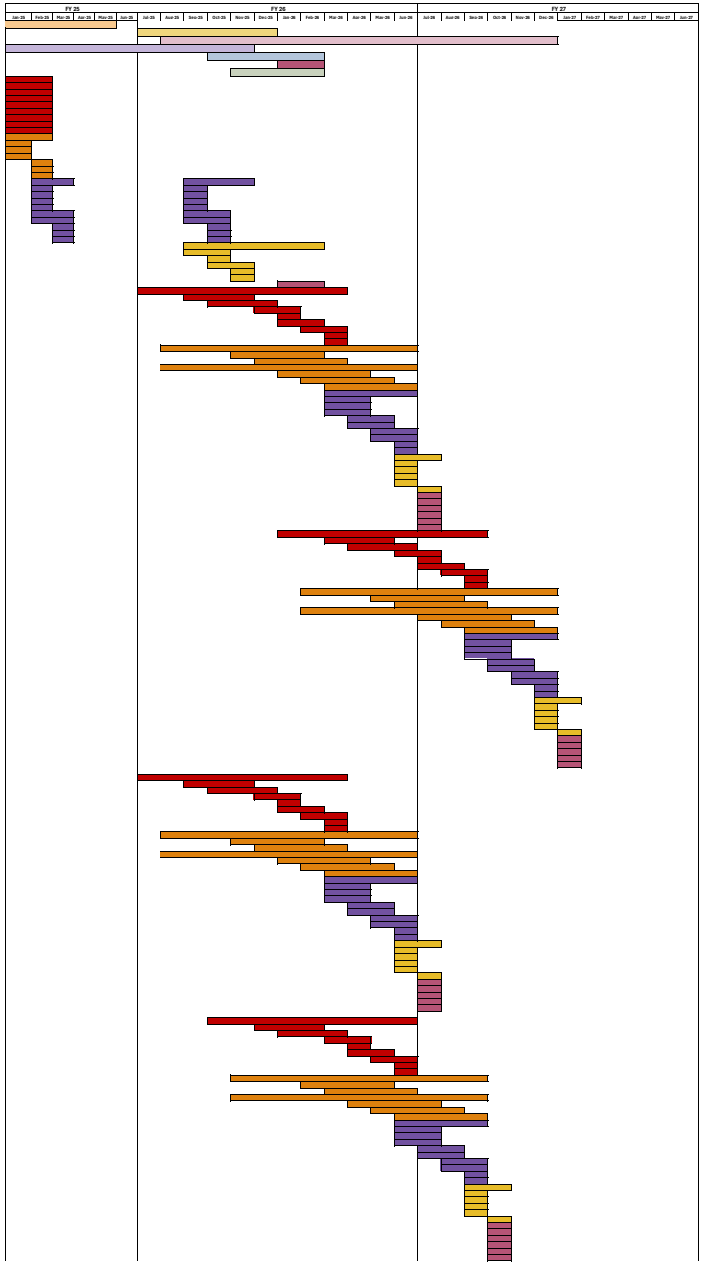
Data Platform Project Timeline (FY 25- 28)



Overall

- **1. Design and provision data platform environment**
- **2. Design journals criteria, payroll GAR model and end to end automation**
- **3. Mapping and supplementary datasets**
- **4. Design risk assessment dashboards for journals and payroll**
- **5. Establish and flexibe access provisioning and review process**
- **6. Usage monitoring and reporting**
- **7. Develop business process documentation and UAT test plan**

Gov Connect

- **1. Onboarding, Environment Setup & Configuration**
  - 1. Design and Provisioning data platform environment
  - 2. Data Transfer Environment
  - 3. Staging and Source Data Storage
  - 4. Data Models in Snowflake
  - 5. Data lake Storage Layers
  - 6. Data lake storage Secure Containers
  - 7. Data Transfer Scripts
  - 8. Access Security Groups
- **2. Data and Business Rules Design**
  - 1. Design and Test Business Rules
  - 2. Data Models and Storage
  - 3. Data Specification and Development
  - 4. Data Loading and Validation
  - 5. Business Rules and Backfill Logic
  - 6. Mapping and Supplementary Datasets
- **3. Data Processing & Transformation**
  - 1. Ingestion Pipeline
  - 2. Error Handling and Logging
  - 3. Monitoring Alerts
  - 4. Data Cleansing
  - 5. Transformation Logic
  - 6. Reconciliation Logic
  - 7. Data Quality Exception Monitoring
  - 8. Quarterly Data Load and Verification
  - 9. Cross-client Dataset Mapping and Testing
- **4. Automation, Testing & Deployment**
  - 1. Journals Criteria and Workpapers
  - 2. Automated Routing of Workpapers
  - 3. Automated Scripts for Audit and Testing
  - 4. Risk Assessment Dashboards
  - 5. Refactoring Design
- **5. Training & Process Documentation**

MyWorkZone

- **1. Onboarding, Environment Setup & Configuration**
  - 1. Design and Provisioning data platform environment
  - 2. Data Transfer Environment
  - 3. Staging and Source Data Storage
  - 4. Data Models in Snowflake
  - 5. Data lake Storage Layers
  - 6. Data lake storage Secure Containers
  - 7. Data Transfer Scripts
  - 8. Access Security Groups
- **2. Data and Business Rules Design**
  - 1. Design and Test Business Rules
  - 2. Data Models and Storage
  - 3. Data Specification and Development
  - 4. Data Loading and Validation
  - 5. Business Rules and Backfill Logic
  - 6. Mapping and Supplementary Datasets
- **3. Data Processing & Transformation**
  - 1. Ingestion Pipeline
  - 2. Error Handling and Logging
  - 3. Monitoring Alerts
  - 4. Data Cleansing
  - 5. Transformation Logic
  - 6. Reconciliation Logic
  - 7. Data Quality Exception Monitoring
  - 8. Quarterly Data Load and Verification
  - 9. Cross-client Dataset Mapping and Testing
- **4. Automation, Testing & Deployment**
  - 1. Journals Criteria and Workpapers
  - 2. Automated Routing of Workpapers
  - 3. Automated Scripts for Audit and Testing
  - 4. Risk Assessment Dashboards
  - 5. Refactoring Design
- **5. Training & Process Documentation**
  - 1. Documentation and Access Provisioning
  - 2. Training and Information Sessions
  - 3. Feedback and Refinements
  - 4. Usage Monitoring and Reporting
  - 5. Develop Business Process Documentation

Health

- **1. Onboarding, Environment Setup & Configuration**
  - 1. Design and Provisioning data platform environment
  - 2. Data Transfer Environment
  - 3. Staging and Source Data Storage
  - 4. Data Models in Snowflake
  - 5. Data lake Storage Layers
  - 6. Data lake storage Secure Containers
  - 7. Data Transfer Scripts
  - 8. Access Security Groups
- **2. Data and Business Rules Design**
  - 1. Design and Test Business Rules
  - 2. Data Models and Storage
  - 3. Data Specification and Development
  - 4. Data Loading and Validation
  - 5. Business Rules and Backfill Logic
  - 6. Mapping and Supplementary Datasets
- **3. Data Processing & Transformation**
  - 1. Ingestion Pipeline
  - 2. Error Handling and Logging
  - 3. Monitoring Alerts
  - 4. Data Cleansing
  - 5. Transformation Logic
  - 6. Reconciliation Logic
  - 7. Data Quality Exception Monitoring
  - 8. Quarterly Data Load and Verification
  - 9. Cross-client Dataset Mapping and Testing
- **4. Automation, Testing & Deployment**
  - 1. Journals Criteria and Workpapers
  - 2. Automated Routing of Workpapers
  - 3. Automated Scripts for Audit and Testing
  - 4. Risk Assessment Dashboards
  - 5. Refactoring Design
- **5. Training & Process Documentation**
  - 1. Documentation and Access Provisioning
  - 2. Training and Information Sessions
  - 3. Feedback and Refinements
  - 4. Usage Monitoring and Reporting
  - 5. Develop Business Process Documentation

Transport

- **1. Onboarding, Environment Setup & Configuration**
  - 1. Design and Provisioning data platform environment
  - 2. Data Transfer Environment
  - 3. Staging and Source Data Storage
  - 4. Data Models in Snowflake
  - 5. Data lake Storage Layers
  - 6. Data lake storage Secure Containers
  - 7. Data Transfer Scripts
  - 8. Access Security Groups
- **2. Data and Business Rules Design**
  - 1. Design and Test Business Rules
  - 2. Data Models and Storage
  - 3. Data Specification and Development
  - 4. Data Loading and Validation
  - 5. Business Rules and Backfill Logic
  - 6. Mapping and Supplementary Datasets
- **3. Data Processing & Transformation**
  - 1. Ingestion Pipeline
  - 2. Error Handling and Logging
  - 3. Monitoring Alerts
  - 4. Data Cleansing
  - 5. Transformation Logic
  - 6. Reconciliation Logic
  - 7. Data Quality Exception Monitoring
  - 8. Quarterly Data Load and Verification
  - 9. Cross-client Dataset Mapping and Testing
- **4. Automation, Testing & Deployment**
  - 1. Journals Criteria and Workpapers
  - 2. Automated Routing of Workpapers
  - 3. Automated Scripts for Audit and Testing
  - 4. Risk Assessment Dashboards
  - 5. Refactoring Design
- **5. Training & Process Documentation**
  - 1. Documentation and Access Provisioning
  - 2. Training and Information Sessions
  - 3. Feedback and Refinements
  - 4. Usage Monitoring and Reporting
  - 5. Develop Business Process Documentation

Education

- **1. Onboarding, Environment Setup & Configuration**
  - 1. Design and Provisioning data platform environment
  - 2. Data Transfer Environment
  - 3. Staging and Source Data Storage
  - 4. Data Models in Snowflake
  - 5. Data lake Storage Layers
  - 6. Data lake storage Secure Containers
  - 7. Data Transfer Scripts
  - 8. Access Security Groups
- **2. Data and Business Rules Design**
  - 1. Design and Test Business Rules
  - 2. Data Models and Storage
  - 3. Data Specification and Development
  - 4. Data Loading and Validation
  - 5. Business Rules and Backfill Logic
  - 6. Mapping and Supplementary Datasets
- **3. Data Processing & Transformation**
  - 1. Ingestion Pipeline
  - 2. Error Handling and Logging
  - 3. Monitoring Alerts
  - 4. Data Cleansing
  - 5. Transformation Logic
  - 6. Reconciliation Logic
  - 7. Data Quality Exception Monitoring
  - 8. Quarterly Data Load and Verification
  - 9. Cross-client Dataset Mapping and Testing
- **4. Automation, Testing & Deployment**
  - 1. Journals Criteria and Workpapers
  - 2. Automated Routing of Workpapers
  - 3. Automated Scripts for Audit and Testing
  - 4. Risk Assessment Dashboards
  - 5. Refactoring Design
- **5. Training & Process Documentation**
  - 1. Documentation and Access Provisioning
  - 2. Training and Information Sessions
  - 3. Feedback and Refinements
  - 4. Usage Monitoring and Reporting
  - 5. Develop Business Process Documentation
